

BioLite BaseCamp

Grill or boil for groups

One touch grill-to-boil lever, flexible cooking height with foldable legs

Keep your site charged

5W output - powering headlamps to tablets, USB light included, stores power for later use

Powered by wood

A powerful alternative to charcoal or propane

Inspired by thousands of requests for the HomeStove from BioLite supporters, BaseCamp brings a whole new meaning to grilling with wood. Thoughtful features like folding legs and one-touch levers make it easy and comfortable to use while BioLite's technology captures waste heat to produce electricity. The large cooktop and side fuel entry enable large-format cooking while an accompanying USB light aids in nighttime or low-light conditions.

USB OUTPUT

5W

WEIGHT

17.92 lbs (8.13 kg)

FUEL

Solid biomass

COOK TOP

13.25" diameter
(fits 8 burgers)
