Centralized Control Box

Easy-to-use digital display for real-time feedback on power availability, speaker control, and device charging

Born out of household research across India and sub-Saharan Africa, the SolarHome 620+ is a self-contained system of solar lighting and charging that can turn any off-grid structure into an electrified home. The system combines functional and protective lighting (motion sensor included), USB charging, and radio and mp3 capabilities, creating a hub designed for everyday use.

Ideal for cabins, van life, and hunting structures, the SolarHome 620+ is a perfect entry into solar living with easy installation and flexible setup.
