

CampStove 2+

Turn Fire Into Electricity

On-Demand Electricity

Updated thermoelectrics provide 50% more power

On-Board Storage

Integrated 3,200 mAh battery can store a full phone charge

Smart LED Dashboard

Control 4 fan speeds and get real time feedback on fire strength and power supply

Burn Wood Like Gas

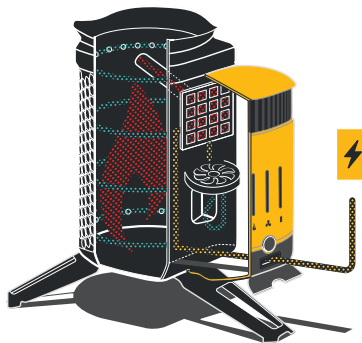

Burn wood including found sticks or BioLite BioFuel pellets

Smokeless Flames

Enjoy a campfire feel with a fire that burns like gas

Turn fire into electricity with BioLite's award-winning wood stove. Patented thermoelectric combustion technology creates a vortex of smokeless flames for a portable campfire that can cook your meals and charge your gear. Featuring an updated 100 lumen FlexLight with ChromaReal LED technology, cook with confidence at night thanks to accurate color rendering.

Fire

Light up a fire to cook your meals. We capture some of the waste heat via a copper probe.

Electricity

Heat is converted into useable electricity via a thermoelectric generator. This powers a fan and flows to a USB port to charge your gear.

Air

An internal fan blows air into the flames to give you a smokeless wood fire, burning wood like gas.

Tech Specs

BATTERY

3,200 mAh lithium-ion

WEIGHT

2.06 lbs (935g)

BOIL TIME

4.5 minutes for 1L

FUEL

Renewable biomass (twigs, sticks, pellets)

DIMENSIONS

5.0 x 8.25 in (127 x 210 mm) - packed size

INPUTS

Micro USB charge in

USB OUTPUT

3 watts peak; TEG generated 5V, 2A USB output

FLEXLIGHT (INCLUDED)

100 Lumens

IN THE BOX

CampStove 2, firestarter, FlexLight, extra storage stuff sack, micro USB cable, instructions
